

**PROCEDURE AND ANESTHESIA CONSENT FORM
JACKSON ANIMAL CLINIC/NORTH MADISON ANIMAL HOSPITAL**

<date> _____ <animal> _____
<number> _____
<first-name> <last-name> _____ <species> _____
<address> _____ <breed> _____
<city>, <st> <zip> _____ <sex-name>, <age> _____

Today's phone number _____

As the owner or agent of the owner of the above animal, I hereby give my consent to Jackson Animal Clinic or North Madison Animal Hospital to perform the following procedures:

General Information Regarding the Procedure and Anesthesia:

Pre-anesthetic Blood Safety Screen – Our on-site laboratory lets us screen for hidden problems before your pet's treatment begins. These tests also provide a baseline for monitoring your pet during surgery and can indicate chemical imbalances that could affect your pet under anesthesia. Required on all animals unless blood work has been done in the past 6 months.

Anesthesia – We use the same safe Isoflurane gas that is often used in human medicine. Isoflurane is primarily eliminated through the respiratory tract rather than through the kidneys or liver. This helps to reduce the risks associated with anesthesia and allows for a quicker recovery.

Monitoring – Your pet is closely monitored through the entire procedure/anesthesia. Your pet's temperature, heart rate and rhythm, respiration, and oxygen levels are continuously checked by our staff and anesthetic monitoring equipment.

Pain Management – Your pet has the same type of nervous system as we do and will perceive pain in a similar way, but cannot express pain the same way we do. We require all animals undergoing surgery to receive pain medication.

There will be an additional \$48 charge for animals that are in heat or pregnant and being spayed.

If your pet is here for a dental, the doctor will perform extractions as needed and there will be an additional charge for each extraction. Minor extractions- \$8 and major extractions-\$55. _____

Additional Procedures Available

Intravenous Catheter with Fluids – Administration of intravenous fluids helps your pet recover more quickly from anesthesia, maintains blood pressure and increases circulation during anesthesia. Surgical IV Fluids are important for all animal but REQUIRED for animals 7 years and older.

\$42.00 Yes _____

Radiosurgery – A specialized surgical unit which utilizes radiowave technology to make incisions minimizing pain at the incision site and improving the healing time of surgery.

\$31.00 Yes _____

I understand that during the performance of this procedure, unforeseen conditions may be revealed that necessitate an extension or variance in the procedure(s) set forth as above. I expect Jackson Animal Clinic/North Madison Animal Hospital to use reasonable care and judgment in performing the procedure(s). The procedure(s) and risks involved have been explained to me and I realize results cannot be guaranteed. I am also aware that unforeseen events resulting from the procedure(s) will not relieve me from my obligation to all reasonable costs incurred regarding the animal.

Signature of Owner/Agent

Receptionist Signature

ALL ANIMALS MUST BE CURRENT ON ALL VACCINATIONS AND MUST BE FREE OF EXTERNAL PARASITES. ANY ANIMAL FOUND TO HAVE FLEAS OR TICKS WILL BE TREATED AT OWNERS EXPENSE.
